

INTERNAL RULES 2012/2014
Established by the International College of the Guarantee in the
beginning of 2011

THE FUNCTIONING OF THE PROCEDURE OF THE PASS

1. The list of *passeurs*

The list of *passeurs* is established in each instrumentality by the local committees responsible for the Guarantee. They transmit it to the ICG which holds the list for all the instrumentalities, with note of the analyst and the date of the proposals.

2. Steps in the functioning of the procedure

The demands for the pass are received locally by the Secretariats of the local pass who establish the list of *passeurs*.

The candidate is received by a member of the Secretariat of the local pass, who refers the candidate to its Secretariat, which then approves or declines the request. The Secretary transmits the response of its Secretariat to the candidate who will then, where applicable, draw the names of his *passeurs*.

For Latin America North and South attached to the instrumentalities of Brazil, due to the distance, each candidate will be received by two people:

For Latin America-North, the member of the ICG of the zone (Beatriz Zuluaga) and the member of the preceding ICG (Mario Brito).

For Latin America-South, the member of the ICG of the zone (Silvia Migdalek) and a member of the preceding ICG (Gabriel Lombardi).

A *passant* can, if he thinks it appropriate, reject a *passeur* and draw another name.

When his testimony is completed, the *passant* informs the Secretary.

The Secretaries of the pass transmit the following to the secretaries of the ICG as they are received:

- The list of demands for the pass;
- The list of passes effectively initiated after the candidates have been interviewed by a member of the local Committee, along with the names of two *passeurs*, and all the necessary information required for the cartel (see various notes below);
- The announcement of the completed passes.

The ICG is responsible for directing the passes towards one of the cartels of the pass, taking languages and incompatibilities into account. They are to be evaluated in each case by the ICG. In a cartel, it would be appropriate to avoid the presence of the analyst of the *passant*, his current supervisor, possibly a current analysand of the same analyst, and also sometimes people who are too close to the *passant*.

When the cartel gives its opinion:

Transmission of the responses of the cartels of the pass

- The cartel writes some detailed and specific comments about his case for the *passant*, which it also transmits to the ICG.
- As soon as possible, a member of the cartel sends this text to the *passant* or speaks to him by phone. Following this, the *passant* can, if he wishes, meet another member of the cartel.
- The response Yes/No is communicated for filing to the Secretariat of the ICG and the Secretariat of the pass concerned.

The Secretariat of the ICG (composed of the two secretaries of the ICG) holds the Notebook with all these steps, informs the ICG of the passes to be studied, and with regard to each pass it transmits, when the time comes, the response of the cartel of the pass and its composition to the Secretary of the local DEL concerned.

The ICG sends all of these rules regarding functioning to the various local secretariats.

3. The cartels of the pass

Three cartels have been constituted by the drawing of lots for a duration of two years. They are responsible for giving a ruling on the passes, and for working on the expected elaboration.

Each of the three cartels is comprised of a member from Spain, a member from South America, and three French members.

4. Other measures

The Analyst Members of the School of the SPFLF can propose *passeurs* as is stipulated in the "Principles". At an opportune moment, they make their proposal to the local Committee responsible for the secretariat of the pass for their zone or the zone to which they are attached for the instrumentalities of the School. Each Committee can also speak to Analyst Members of the School, to the Analyst Members of the School of the attached forums in particular.

The Secretariats of the pass draw their *passeurs* from *passants* on a list of *passeurs* comprising those *passeurs* who have not yet taken up their function in the procedure of the pass or, alternatively, who have been involved in the lowest number of procedures.

The *passeurs* must necessarily speak the same language as the *passant*, or speak a language that the *passant* speaks, but not necessarily be from their place.

The mandate of a *passeur* is limited to two years.

It would also be necessary for the local committee to ensure that the *passant* who draws his *passeurs* by lot is ready to commence his testimony immediately, and to see that the testimony does not go on indefinitely.

THE GUARANTEE

The composition of the International Committee of Accreditation of AMS

In the second year of its mandate the International College of the Guarantee constitutes from within it the International Committee of Accreditation. Its composition is proportional to the number of members of the School in each zone. The list of the new Analyst Members of the School is published in June/ July of this second year.

Functioning

At the commencement of its taking office, the ICG reminds the local Committees of the tasks that are incumbent upon them with regard to the criteria and the gathering of information about potential Analyst Members of the School, particularly in zones attached to an instrumentality.

The local Committees for the guarantee can send their proposals for AMS for their instrumentality at any time.

The International Committee of Accreditation establishes the new list of Analyst Members of the School once a year at the most.

THE LOCAL COMMITTEES OF THE SCHOOL 2012/2014

FRANCE

Admission of members of the School

**A) The articulation between the admission to the Forum and to the
School**

The rule that consists of first entering the Forum and then the School, must
be maintained. However, it must be applied with tact and in some exceptional
cases a simultaneous entry into the Forum and the School could be
envisaged.

B) The question of criteria has been taken up and has led to the following
suggestions:

- Two interviews or one interview with two people does not appear
excessive.
- Regular participation in the activities of the Forum or the division,
particularly in cartels, and possibly in the Clinical College to which the
candidate belongs, is to be taken into account.

But the question of greater participation in the national activities, for
example, the *Journées*, must be taken into account.

Since our School has international instrumentalities, the international
dimension cannot be ignored. At the least at the first interview this
dimension must be presented to the candidate so that he is fully aware of
where he is intending to enter before his second interview.

- The works published following the *Journées*, inter-cartels etc, are an
objective indicator of the involvement of a candidate are to be taken
into account.

- Consultation with the analyst or supervisor cannot be obligatory. It is for the Committee to judge if, in such and such a case, it could be opportune.

C) Condition of admission as member of the School of members for Forums attached to the French instrumentality:

The general condition for admitting a member of the School belonging to an attached instrumentality is that enough is known about his analytic training. That can only be done according to the following modalities: analysis with a member of the School; or on the basis of a proposal made by the Committee for Reception and the Guarantee (CRG) during the interview for admission for entering the procedure of the pass. Supervision can be a complement, but it is not sufficient in itself.

On the basis of these general conditions, the CRG of course makes responses suited to each case.

Moreover, if one of the candidates made the pass and was not nominated AS, the cartel that listened to his testimony could possibly propose his admission as member of the School.
